

Description:

tested site url: <https://www.saucedemo.com/>

Language	In my Selenium Project I am using Java language and IntelliJ IDEA.
Design pattern:	<p>Page Object Model.</p> <p>I have separate Packages for Pages and Tests. All the web pages related classes come under Pages package and all the tests related classes come under Tests package.</p> <p>In Tests package, there is TestBase class, responsible for configuration and initializing the WebDriver</p>
Screenshots:	Screenshots will be captured on test fail and stored in a separate folder „screenshots”
Test Data:	To derive test data I am using @DataProvider which is part of TestNG
Others:	TestNG, Listeners, Git – version control
Manual:	This folder contains manual test cases and its issue reports with attachments.
